## ABOUT ME

Aspiring Computer Science and Engineering student with a strong passion for Blockchain Development, Full Stack Development, AI, and ML. Skilled in building decentralized applications using Web3, smart contracts, and blockchain protocols like Ethereum and Solana. Experienced in Python, Java, DSA, and competitive coding. Eager to solve real-world problems through innovative and scalable tech solutions.

## EDUCATION

- **Bachelor of Technology in Computer Science and Engineering** 2023-2027  
*Centurion University of Technology and Management, Odisha* CGPA: 9.05
- **Higher Secondary**  
*Adyant Higher Secondary School* Percentage: 67.83%
- **Matriculation**  
*S.S.S. Highschool, Jhinkiria* Percentage: 77.66%

## EXPERIENCE

- **Internship | Prustaz Technologies Pvt. Ltd.**  
*Hybrid*
  - Contributing to real-world software and blockchain development projects while gaining hands-on experience in modern technologies.
  - Collaborating with team members to build scalable solutions, improve problem-solving skills, and enhance development workflows.
- **Ambassador | HeLa Labs**  
*Hybrid*
  - Prioritized building on the HeLa ecosystem, successfully developing and deploying decentralized applications (dApps).
  - Represented HeLa Labs as a regional event organizer, promoting the ecosystem and driving Web3 community engagement.

## PROJECTS

- **DVOTE DAO - Decentralized Governance & Voting dApp**  
*React.js, Tailwind CSS, Wagmi, Ethers.js, Solidity, IPFS*
  - A Web3 governance platform that enables DAO members to create proposals, vote securely using governance tokens, and execute decisions transparently through smart contracts, with proposal metadata stored on IPFS.
  - 🌐 **GitHub:** DVote DAO
- **CLORIT - Carbon Credit & Blue Carbon Platform**  
*Vite, TypeScript, React, Tailwind CSS, shadcn-ui*
  - A sustainability dApp enabling carbon credit trading, blue carbon restoration tracking, and role-based dashboards for NGOs, communities, and buyers.
  - 🌐 **GitHub:** CLORIT
- **ZYPHERION - Cross-Chain Automation Protocol**  
*Next.js, TypeScript, Node.js, MongoDB, Circom, snarkjs, Stellar (Testnet)*
  - Developed a production-grade decentralized protocol enabling users to define cross-chain logic, verify off-chain computation via zero-knowledge proofs, and automate execution securely.
  - 🌐 **GitHub:** ZYPHERION

## SKILLS & KEY COMPETENCIES

**Blockchain & Smart Contracts:** Solidity, Ethereum, Web3.js, Hardhat, Solana  
**Programming Languages:** Python, Java  
**Web Development:** HTML, CSS, JavaScript, React.js, Node.js, TypeScript, Tailwind CSS  
**Tools & Technologies:** Git, GitHub, VS Code, REST APIs, JSON, Linux, Docker  
**Databases:** MongoDB, SQL, Firebase  
**Core Subjects:** Data Structures & Algorithms, Software Development Lifecycle (SDLC)

## CERTIFICATIONS & ACHIEVEMENTS

- **Appreciation Winner in Anveshana** Feb 2026
- **HackOdish 5.0 WEBWIZ.NITR** Aug 2025
- **Agoric Fast Hack Hackathon** Jan 2025
- **HackerRank - Python Basics** Nov 2024
- **D3 Fest - Hackathon** Nov 2024
